

Artificial Intelligence For Your Business

WE, "PROTOSPARK" USE CUTTING EDGE IMAGE AND VIDEO PROCESSING TECHNOLOGY TO SOLVE YOUR ISSUES!

Crop monitoring

When it comes to crop monitoring, our technology supports you in pest identification and harvest estimation.

Floor management

Our technology can be used for the floor management with the features like people counting and object identification. This can be implemented in production facilities, restaurants, parking lots, event venues etc.

Livestock management

Livestock should be closely monitored on a daily basis. Why waste your manpower? We can provide digital solutions in livestock counting and identification

We are ready to work with your team in developing a fully customized solution which suites your organization perfectly.
